

WILD THINGS

FINLAND

COMPANY & VISION

Wild Things Finland Oy is a Finnish water company whose purpose is to export Oripää's high-quality water to the world's growing water market, while remembering the environment by using recyclable and sustainable carton packaging solutions. The company has signed a water abstraction agreement (15 years) with Oripää municipality on 24 February 2023 and bought its own water plant on May 3, 2023.

PREMIUM WATER

Finnish water quality is one of the best on the planet and this is de facto, not marketing jargon. At least, it says so in [the United Nations World Water Development Report](#) and that's as reliable a source of information about water quality as it gets.

Wild Things Finland water facility is in Oripää, a well-known premium water area in Finland. The water of the ridge in question has been placed among [the world's three cleanest drinking water deposits in the world](#). So, we have the legit right to say that our water is among the purest waters on the planet. **"Best in Finland, one of the best in the world."**

PRODUCTS

Bag in a Box – 5.05 l

Superior quality artesian water now in a practical and larger package solution designed for airline trolleys, e-commerce distribution, homes, boats, camping and summer cottages.

The mammoth water packages in our product family give the consumer the best of both worlds: Volume and quality.
